Report

WG "Geothermal Atlas of Europe"

The project has made a good progress
The present state is as follows:

1. Maps

The maps in a scale 1 : 2.5 Mill. (T 1000 m and q) are ready. The maps in a scale 1 : 5 Mill. are ready for Europe East. The sheets Europe West have to be prepared for T 500, T 1000, T 2000, T 3000, T 5000 and q. This compilation will be done latest by September 1989.

2. Explanatory text

The manuscripts of the explanatory text for 25 countries have been submitted to the publishing house on July 10. There are missing the explanatory texts for Hungary, Denmark, Austria.

3. Catalogue of heat flow density data

The catalogue is ready for all European countries with the exception of Belgium where there are no heat flow data. The listing is prepared also for the Caspian Sea, the Black Sea, the Mediterranean Sea and the North Atlantic Ocean. The catalogue is submitted for publication to the publishing house.

4. Proof prints are ready for 4 sheets in the scale 1 : 2.5 Mill. (Moscow: T 1000 and q; Sofiya: q and London: T 1000) and 4 sheets in the scale 1 : 5 Mill. (depth of the Crust-Mantle-Boundary Europe East and West; Average seismic velocity Europe East and West).

5. A leaflet for advertising has been prepared.

6. The Commission for the Geological Map of the World (CMGW) was so kind to include the proof prints in the map exhibition at the International Geological Congress in Washington 1989.

7. The publication of the "Geothermal Atlas of Europe" is planned for 1990.

8. The editors-in-chief like to thank all the national editors and authors for the excellent co-operation.
